OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange (PSEi) gained month-on-month, rising 7.8% in October primarily due to the slowdown of new daily COVID-19 cases in the country, as well as the easing of quarantine restrictions despite Metro Manila remaining nominally under a general community quarantine (GCQ) until end-November. Concerns regarding budget delays have also been addressed as the issue regarding the leadership in the House of Representatives has been quickly resolved. Further adding support to the market were the first round of third quarter earnings results, which generally showed improvements on a quarter-on-quarter basis. Foreigners continued to be net sellers in October, with portfolio outflows amounting to PHP7.59 billion or USD156.3 million for the month.

Top gainers for October include LTG (+28.2%), FGEN (+22.1%), and JFC (+17.2%), with the largest month-on-month detractors being PGOLD (-15.8%), AEV (-3.2%), and BLOOM (-3.2%). Year-to-date, EMP (+39.0%), TEL (+34.4%), and FGEN (+18.0%) were the best performers, with SECB (-50.6%), GTCAP (-49.2%), and RLC (-45.6%), being the worst performers.

This month, the BTr reissued Php 30 Bn of the 3-yr paper 3-25 with coupon 2.375% with bids fully awarded at an average rate of 2.182% and another Php15 Bn awarded via the tap facility. It also reissued Php 30 Bn of the 5-yr paper 10-60 with coupon 3.625% with bids also fully awarded at an average rate of 2.782%. The BTr has scheduled another round of 3-yr and 5-yr bonds for auction in November, and the Php 3 Bn of 1yr prize bonds are set for November 11 as well.

OUTLOOK AND STRATEGY

Fund Performance. The Fund returned 3.97% for the month, outperforming the benchmark by 10 basis points.

Fund Strategy. We are looking to maintain our equity position at current levels, possibly increasing cash during the short-term. Profit-taking may occur in the short-term following the market's run-up above the 6000 level, but we are keeping our strategic weight on equities in the long term. We continue to like liquid names in defensive industries with good earnings visibility, as well as names that would benefit from loose monetary policy.
