INVESTMENT OBJECTIVE AND STRATEGY

The investment objective is to achieve capital preservation with returns and inflows derived out of investments in fixed income and money market instruments.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Prospectus of the Fund, which may be obtained from the Fund Manager, before deciding to invest.

The **Philam Bond Fund** is suitable only for investors who:

- Are at least classified as **conservative** based on their risk profile.
- Have an **investment horizon of up at least five (5) years.**

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with some of the accompanying risks.

Market Risk: The risk that movement in the financial markets will adversely affect the investments of the Fund. To properly manage market risk, various risk measurement methodologies are utilized to quantify the potential changes in portfolio value resulting from changes in security prices.

Interest Rate Risk: The risk that the value of the portfolio will decline as interest rates rise (since bond prices and interest rates are inversely related). Interest rate risk is measured using duration and controlled through duration limits.

Liquidity Risk: The risk that the investments of the Fund cannot be sold or converted into cash within a reasonable time or sale is possible but not at a fair price. A liquidity contingency plan is in place.

Credit Risk: The risk that the bond issuer may not be able to pay its debt when interest payments and maturity falls due. Credit risk is minimized through diversification, establishment of investment and counterparty limits and through accreditation process of investment outlets.

Inflation Risk: The risk the return of your investments will not keep pace with the increase in consumer prices. To mitigate inflation risk, the Fund Manager closely monitors inflation.

Reinvestment Risk: The risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are re-invested. Reinvestment risk is mitigated by closely monitoring interest rate trends.

OUTLOOK AND STRATEGY

Market Review. Inflation in September rose 2.3% as expected. In its October meeting, the BSP kept the key policy rate unchanged at 2.25%. It cut its inflation forecast to 2.3%, 2.8%, and 3% from 2.6%, 3% and 3.1% respectively for 2020, 2021, and 2022, well within its target band of 2%-4%. BSP Gov. Diokno has stated that there will be a pause in monetary policy easing as economic activity has stabilized but uncertainty remains as COVID 19 is seen to have made a resurgence in some areas but the BSP remains ready to deploy its tools as needed. Early this month the BSP approved a new Php 540 Bn interest-free advance to the government. Market participants remain on the sidelines awaiting the US 2020 elections in early November and are on the lookout for 3Q GDP data with expectations at 8.9%, a lower print possibly signaling more monetary policy action from the BSP. The November BSP meeting is scheduled for Nov 11.

This month, the BTr reissued Php 30 Bn of the 3-yr paper 3-25 with coupon 2.375% with bids fully awarded at an average rate of 2.182% and another Php15 Bn awarded via the tap facility. It also reissued Php 30 Bn of the 5-yr paper 10-60 with coupon 3.625% with bids also fully awarded at an average rate of 2.782%. The BTr has scheduled another round of 3-yr and 5-yr bonds for auction in November, and the Php 3 Bn of 1yr prize bonds are set for Nov.11 as well.

Fund Performance. The Fund returned -0.05% for the month, underperforming its benchmark by 26 basis points. Year-to-date, return amounted to 5.59%, underperforming its benchmark by 488 basis points.

Fund Strategy. The fund will gradually move its duration closer to the benchmark duration. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
